MCDOWELL BEEKEEPERS---A CHAPTER OF THE NC STATE BEEKEEPERS ASSOCIATION

IN THIS ISSUE

The McDowell Beekeepers

The McDowell Honey Bees is a chapter of the North Carolina State Beekeeping Association and meets the 2nd Thursday of every month except December (no meeting). McDowell County has a rich history of beekeeping and the club serves the community by promoting beekeeping with educational monthly meetings, school presentations, a free Bee School every winter, agricultural presentations, involvement in community festivals, and hosting two annual "Best Tasting Honey in McDowell County" competitions.

In addition, our club serves established beekeepers with novice, intermediate, and advanced level classroom and field education, seasonal beekeeping programs, discussion sessions, and providing support and training to advance our beekeepers in the North Carolina Master Beekeeper Program:

Certified Beekeeper
Journeyman Beekeeper
Master Beekeeper
Master Craftsman Beekeeper

Our monthly meetings are open to the public and everyone is welcome to attend!

2019 CLUB OFFICERS

President: Ed Speer
Vice President: Merrill Davis
Secretary: Karen Speer
Treasurer: Jim Austin
Directors:
Ray Revis
Adam Wright
Sharon Fairchild
Jason McCurry
Kaylyn Fairchild (Youth Director)
Extension Services Agent—Adam Lawning

2019 Best Tasting Spring Honey in McDowell County Contest

Who has the best tasting Honey?

Bring a 1-lb bottle of your 2019 honey and enter the contest

We will meet at the new Keeper's Cut Meadery at 175 W. Henderson St., Marion, NC at 6:30 pm. The honey contest starts at 7 pm. The top 3 winning honeys will be submitted for pollen testing (paid for by the club).

Everyone is welcome; beekeepers, club members and all family, friends and guests. As usual, snacks and non-alcoholic beverages will be available. Local honey-wine (mead) will be available for purchase from the meadery. Door prizes will also be presented, so don't forget to bring appropriate items.

The Keeper's Cut Meadery was recently opened by club members and local beekeepers Charlie Myers and Kathryn Current. Come and taste their unique selection of meads made with local honeys.

TREASURY REPORTS

The treasury reports will be included in each monthly newsletter but will not be presented in detail at the regular monthly meetings. The Executive Committee has oversight of the club's treasury and reviews the details at each bi-monthly EC meeting. If you have any questions or concerns about the club's treasury, you will be given an opportunity to speak at the regular monthly meetings or you may speak to an officer or director, who will then present your comments at the next EC meeting. Club members are welcome to address the directors at any Executive Committee meeting.

MCDOWELL HONEY HOUSE

The Honey House is open for the summer. Contact Adam Wright to schedule an appointment or to borrow equipment. Adam Wright blueold96@yahoo.com
828-442-7817

Bee School

The club's annual Bee School offers beginner beekeepers classes and hands-on training leading to **Certified Beekeeper** status by the NC State Beekeepers Association.

THERMAL MITE TREATMENT

Club members can rent one of the Mighty Mite Killer units recently purchased by the club. This is a non-chemical method of controlling Varroa mites. To schedule your 2-day rental period, contact Ed Speer Ed@SweetBetsyFarm.com or 828-724-4444

McDowell Honey House

The McDowell Honey House is a fully equipped self-service honey processing facility built and maintained by the McDowell Honey Bees. It is open to all club members—reservations required.

BEGINNER MENTORING

*Need an experienced beekeeper's help? Contact our club's mentoring program Chairman Jason McCurry to be assigned a mentor. jmccu8777@aol.com

MCDOWELL BEEKEEPERS EXECUTIVE COMMITTEE MEETING

Thursday Jul 9, 2019 6:30 PM

McDowell Honeybee Chapter EC meetings
are held every other month

2019 EC Meetings:

Jan 8	Jul 9
Mar 12	Sep 10
May 7	Nov 12

All officers and directors are expected to attend. Club members are also welcome---please contact the president ahead of time if you wish to address the board or place topics on the agenda.

MCDOWELL BEEKEEPERS MONTHLY CLUB MEETING

THURSDAY JUNE 13, 2019

6:30 pm
Keeper's Cut Meadery
Marion, NC

2019 Monthly Club Meetings:

Jan 10	Jul 11
Feb 14	Aug 8
Mar 14	Sep 12
Apr 11	Oct 10
May 9	Nov 14
Jun 13	Dec--no meeting

Door prizes at beekeeper gatherings are a strong long-standing tradition. Donations for our monthly meetings are encouraged and welcomed. Please bring your donated items to the next meeting. Here's your chance to highlight your products or handicrafts, clean out your storage locker, or simply share your bounty with fellow beekeepers!

ADVANCED BEEKEEPING CLASSES--JUNE

June 15, 22 & 29

Bill Hendley's advanced beekeeping classes are held the last 3 Saturdays in June. Required registration ends June 5th. Contact Adam Lawing or Heather Peek at 828-652-8104 or adam_lawing@ncsu.edu

BEST TASTING HONEY COMPETITIONS

The McDowell Honeybees hosts two **Best Tasting Honey in McDowell County** competitions every year!

Spring Honey (June 13)
Summer Honey (September 21)

Plan to enter your honey in 2019!
The top 3 winning honeys are sent to Texas A&M University
for pollen analyses, paid for by the club!

4-H BEEKEEPING GROUP STARTING!

McDowell County's own 4-H Beekeeping group is getting started! Sponsored by the McDowell Cooperative Extension and the McDowell Beekeepers Association. 8 kids signed up at the initial meeting October 25th. Call Chad (828-652-8104) or Sharon (828-652-9478 or 460-4044) for more information or to sign up.

HONEY BEES WORK HARD

How much honey does a single worker bee produce during her lifetime?

1/12 teaspoon!

How many honeybees does it take to make 1 lb. of honey?

800 honeybees working for 2 weeks! Or 11,000 honeybees working for 1 day!

How long would a single worker bee have to live forging every day to produce 1 lb. of honey?

29.5 years!

How far do honey bees fly to produce 1 lb. of honey?

55,000 miles! That's 2.2 times the distance around the earth!

How many flower visits does it take to produce 1 lb. of honey?

2 million!

WHAT SHOULD I DO WITH CRYSTALLIZED HONEY?

1) Eat it like spreadable paste. It has probably not spoiled. Many cultures around the world prefer crystallized rather than liquid honey---Yes, they wait for honey to crystallize before eating it! Creaming crystallized honey by periodically stirring makes a smooth, delicious spread. Use like butter on toast, biscuits or muffins.

2) Return it to liquid with low heat applied over a long time. Set bottle of crystallized honey on dashboard of car parked in the sun---works in a few hours (summer) to a few days (winter). OK, doesn't work in really cold weather, but you should avoid heating honey in a microwave or in a boiling-water bath on a stovetop because that much high heat kills beneficial bacteria and enzymes.

Storing honey in the refrigerator can hasten crystallization! Storing in dry, room-temperature dark kitchen cabinet can slow the crystallization process.

Recipe of the Month

HONEY SPICED CIDER

From www.SweetBetsyFarm.com

Ingredients

2 quarts of apple cider
Peel from 1 large or 2 medium oranges
1 tablespoon ground cinnamon or 4 cinnamon sticks
1 tsp ground cloves or 1 tablespoon whole cloves
¼ cup raw honey

Directions

1. Peel oranges taking only the orange part of the peel---you do not want any of the white as it will make the cider bitter.
2. Mix all ingredients in a saucepan and heat.
3. Simmer 10-15 minutes, stirring occasionally.
4. Adjust sweetness by adding more honey if desired.
5. Serve hot.

Submit your favorite honey recipe for the next newsletter

MCDOWELL COUNTY HONEY TRAIL

Looking for Local Honey or something fun to do in McDowell County?

Visit an active bee farm
Find local honey for sale

www.McDowellCountyHoneyTrail.org

BEE JOKE OF THE MONTH

What kind of weapon does a bee use?

(Find answer on last page)

DOES HONEY GO BAD?

Normally---no. Some honeys stay fresh for thousands of years. Most honey will eventually crystallize, but crystallization is not spoilage---just a change in physical state. Honey is naturally anti-microbial and kills most bacteria, fungus, and viruses. Honey is antiseptic and is often used to heal infected wounds.

However, the water naturally contained in honey may separate out during crystallization. Mold and/or alcohol can then develop in the expelled water and cause spoilage. Fermented honey will smell and taste like alcohol.

Yeast in the air is the culprit--to prevent crystallization and possible spoilage, store honey in full, air-tight containers at room temperature.
